PROFILE SUMMARY

Motivated and detail-oriented cybersecurity enthusiast with a strong foundation in network security, threat analysis, and secure coding practices. Proficient in Python with hands-on experience in developing secure applications, including sandbox-based execution systems. Familiar with networking protocols such as TCP/IP, DNS, HTTP/HTTPS, and experienced in using tools like Wireshark and Nmap for traffic analysis and vulnerability assessment. Possesses a solid understanding of SOC operations, incident response, and log analysis. A quick learner with strong problem-solving and communication skills, seeking an opportunity to contribute to organizational security and grow as a cybersecurity professional.

EDUCATION

ST MARTINS ENGINEERING COLLEGE, Hyderabad

2020-2024

Bachelor in Information Technology

CGPA:7.68/10

ST MARTINS ENGINEERING COLLEGE, Hyderabad

2022-2024

Minor Degree in AI and ML

CGPA:8.06/10

ALLPHORES JUNIOR COLLEGE, Karimnagar

2018-2020

Intermediate MPC

Percentage:85/100

PROJECT

CYBER CRIME AND SECURITY SIMULATION SYSTEM |Java, Python

- Developed a cybersecurity simulation system for real-time network monitoring and threat detection.
- Implemented a multi-threaded server and MapReduce-based network monitor to analyse and classify normal vs malicious packets.
- Integrated machine learning techniques for anomaly detection, improving proactive identification of cyber threats
- Enhanced system efficiency by filtering malicious/oversized data and enabling secure, reliable data transactions

ELECTRICITY THEFT CYBER-ATTACK DETECTION USING DEEP LEARNING | Python

- Developed a deep learning-based system to detect electricity theft cyber-attacks in IoT-enabled smart meters using DNN, CNN, and GRU models.
- Performed data preprocessing including cleaning, normalization, encoding, and dataset splitting to improve model accuracy and efficiency.
- Designed and implemented multiple models with performance evaluation using precision, recall, F1-score, and accuracy, along with ROC curve visualization.
- Built in interactive GUI application using TK inter for dataset upload, model execution, real time prediction, and comparative analysis of algorithms.

TAMPER-EVIDENT LOGGING SYSTEM | Python, Cryptography

- Developed a secure logging system using SHA-256 hashing to ensure data integrity and prevent unauthorized modifications.
- Implemented hash chaining mechanism (blockchain-like structure) to detect log tampering, deletion, and reordering.
- Designed an automated integrity verification module to identify and report the exact point of tampering in log data.
- Built a persistent storage system using JSON, enabling real-time log saving and retrieval.
- Integrated a tampering simulation feature to demonstrate system security and validate detection mechanisms.

CONTROLLED EXECUTION SANDBOX FOR SECURE CODE PROCESSING | Python

- Developed a secure sandbox system to safely execute untrusted user code using layered security mechanisms.
- Implemented AST-based static analysis to detect and block malicious operations like unauthorized functions, imports, and attribute access.
- Designed a restricted execution environment with whitelisted built-ins, preventing file access and system-level exploitation.
- Integrated multiprocessing with timeout control to terminate infinite loops and prevent resource exhaustion, ensuring safe execution.

TECHNICAL SKILLS

- **Programming Languages** : Python, Bash.
- **Cybersecurity Skills** : Network Security, Threat Detection, Vulnerability Assessment Incident Response, SOC Operations, Penetration testing.
- **Networking** : TCP/IP, DNS, HTTP/HTTPS, SMTP, OSI Model.
- **Security Tools** : Wireshark, Nmap, Burp Suite, Metasploit, Splunk, Qrardar.
- **Operating Systems** : Windows, Linux (Kali Linux), Parrot, Ubuntu.
- **Database** : SQL, MySQL.
- **Concepts** : OOPs, Secure Coding Practices, Log Analysis.
- **Tools** : VS Code, Git, GitHub.
- **Soft Skills** : Communication, Team Collaboration, Analytical Thinking

CERTIFICATIONS/ACHIEVEMENTS

- CEH Certified Ethical Hacker by EC-Council.
- Cyber Job Simulation Certificate by Deloitte.
- Cyber Security Professional certification from Hacker School.
- Completion of Ethical Hacking in Udemy
- Completion of Python in Udemy
- Minor Degree in Artificial Intelligence and Machine Learning.
